

PRODUCT SUBMITTAL

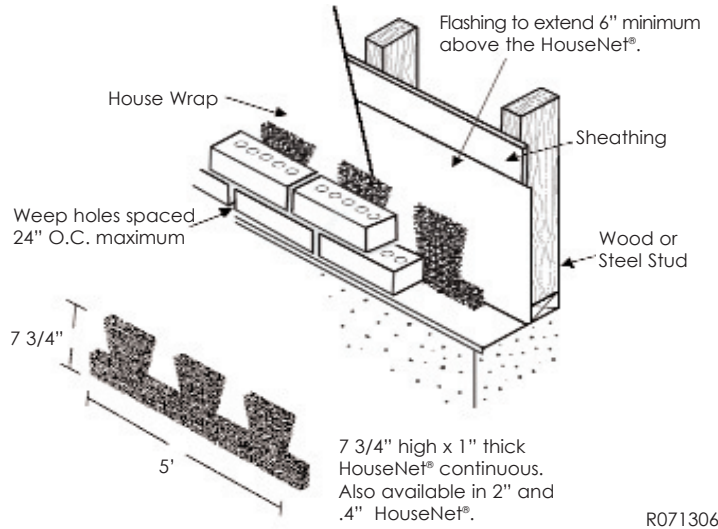

HouseNet[®]

DESCRIPTION

RESIDENTIAL HOUSENET[®] In masonry veneer construction Residential HouseNet's patented "dovetail" shape prevents mortar droppings from forming a continuous dam and allows water to rapidly and easily move through the material to the weep holes. Residential HouseNet[®] should be used in conjunction with Mortar Net Weep Vents[™].

SHORT FORM SPEC

Provide recycled polyester mesh dovetail configuration with continuous bottom strip, to maintain airflow and drainage while suspending mortar droppings at unequal heights. Provide one or more thickness as required to fill cavity width. Install per manufacturer's instructions.

R071306

Product: Subject to compliance with requirements, provide "HouseNet[®]" by Mortar Net USA, Ltd.

MANUFACTURER

Mortar Net USA, Ltd.
541 South Lake Street, Gary, IN 46403
Telephone: (800) 664-6638
Fax: (219) 939-3877
Email: info@mortarnet.com
Website: www.MortarNet.com

Specifier Note: The Residential HouseNet[®] is made of 50% recycled polyester of which a minimum is 17% post consumer and 33% post industrial polyester, with an anti-microbial additive to control mold growth. This material will not oxidize, rot, promote mold or fungus, or react with other common building materials such as mortar, cement, asphalt, modified bitumen, PVC, copper, or galvanized metal, thereby ensuring long-term performance for all materials. The void volume of these 2.0", 1.0" and 0.4" products is approximately 99% with only 1% solidity. The Residential HouseNet[®] is patented, US Patent Reissue #36676.

SUBSTITUTIONS

No substitutions permitted

- HouseNet RMN 7-04: 7.75" (197 mm) high x 0.4" (10.2 mm) thick material.
- HouseNet RMN 7-1: 7.75" (197mm) high x 1" (25.4 mm) thick material.
- HouseNet RMN 7-2: 7.75" (197 mm) high x 2" (51 mm) thick material.
